

Testimonials Regarding Doug Hawkinson

(A Sampling of clients and coworkers)

Brian Allen Big Data Engineer

I worked with Doug for about a year and a half, developing interfaces between an enterprise managed care system and a general ledger system. I was the business analyst and Doug was designing the enhancements. I appreciated Doug's breadth of business knowledge and his commitment to delivering a solution that actually worked despite a challenging project scope.

Gloria Sousa Manager Business Intelligence, Business Analysis & Consulting at Blue Shield of California

I've worked with and engaged Doug for executive/senior consulting several times over the last 30 years, all with outstanding results. Doug is the type of expert who immediately comes to my mind to recruit when a business challenge is complex and without a known solution. I've known him to work tirelessly, always with the highest integrity, to achieve incredible results in nearly impossible timeframes while still maintaining a sense of humor and balance. He is an architect of solutions, planner for quality results, and always keeps an eye on minimizing business risk. He is also a teacher who is willing to share his methods for getting results and makes an excellent project leader.
